1- SYMBOLS

Graphic symbols used on this manual:

THIS SYMBOL INDICATES A HOT SURFACE

THIS SYMBOL INDICATES ELECTRIC SHOCK RISK

THIS SYMBOL INDICATES GENERAL RISK

t_a 40°C

THIS SYMBOL INDICATES THE MAXIMUM OPERATING AMBIENT TEMPERATURE

THIS SYMBOL MEANS “DO NOT STARE AT THE OPERATING LIGHT SOURCE”

THIS SYMBOL INDICATES PHOTOBIOLOGICAL SAFETY

Risk Group 2

THIS SYMBOL INDICATES THE EUROPEAN COMMUNITY DIRECTIVE 2012/19/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE)

2- GENERAL WARNING

Read the instruction contained in this user manual carefully, as they give important information regarding safety during installation, use and maintenance.

The unit is not for household use and must be installed by a qualified electrician or experienced person.

Always disconnect the device from the mains before maintenance.

The device must always be equipped with an efficient ground connection.

3- GENERAL WARRANTY CONDITIONS

The unit is guaranteed for 36 months from the date of purchase against manufacturing material defects.

The warranty covers defects in materials and workmanship. The warranty is not applicable where a defect is caused by misuse or unauthorised repair of the product.

Any functional or/and physical modification of the product is not allowed.

4- TECHNICAL FEATURES

PROFILO LED 120 HQS is an LED-based profile spot perfect for theatre, television and any applications where impeccable reproduction of colors is a key factor.

The unit is equipped with a high efficiency 120 W 4-color LED source coupled with a 20° - 38° high-definition linear zoom with double optical condenser lens.

White color temperature is linearly tunable from 2700K to 8000K.

'Hi-Q dimming' technology guarantees a perfect linearity in the fade-in and fade-out at all dimming levels.

The unit features an internal system with four removable shutters.

Connections are made via PowerCon TRUE 1 In/Out panel connectors, and DMX In/Out panel connectors.

DTS' HQS (High Quality Spectrum) trademark certifies a projector' superior white light quality, and its ability to generate an extended color palette featuring a wide range of soft shades.

DTS Product code:

03.TP050.46 PROFILO LED 120 HQS 5P BLACK

Output

High-power 4-color LED source

LED lifespan: 50.000 hours (70% lumen output)

Optical group

20° - 38° linear zoom

High definition zoom lens with double optical condenser lens

Color generation

16 million colors

Wide palette of pure uniform whites with variable linear color temperature (2700K – 8000K)

Control

DMX 512 / RDM

10 DMX channels (Default)

4-digit 7-segment LED display + 4 soft keys

Internal operating system updatable via DTS Dongle Firmware Uploader

Power supply

Full-range 100-240Vac 50-60 Hz

Power consumption: 120W Max

Connections

Power supply: PowerCON TRUE1 In/Out panel connectors

DMX: XLR 5-pole In/Out panel connectors

Internal safety devices

Overvoltage and overtemperature circuits protection

Operating temperature

-10° / 40°C

Physical

IP20

Weight: 5,8 Kg

Finishing: Black

Certifications

DIMENSIONS

5- ACCESSORIES

As standard

- 1 x Cable with PowerCON TRUE1 female connector (Code 02K0012267.0015)
- 1 x Filterframe black finishing (already installed on the projector) (Code 02M00426.46)
- 1 x Soften filter 10° (Code 02SK0464)
- 4 x Shutter blades (single blade code 02SK0335)
- 1 x User's Manual

Optional (on request)

- Gobo Holder (Code 03.TA224)
- Iris/diaphragm (Code 03.TA223)
- "C" Clamp G50 (Max. Load 10 Kg) (Code 0521A012)
- "C" Clamp G60 (Max. Load 50 Kg) (Code 0521A004)
- Safety cable 3 mm x 60 cm, max capacity load 60 Kg (Code 0521A010)
- DTS Dongle firmware uploader (code 03.LA.206)

6- IMPORTANT SAFETY INFORMATION

6.1 Fire prevention:

Replace any blown or damaged fuses only with those of identical value: T 2A 250V.

6.2 Prevention from electric shock:

High voltage is present inside the unit. Unplug the unit prior to performing any operation which involves touching the inside of the unit.
This equipment must be grounded, do not connect to non-grounded supplies.
The use of a thermal magnetic circuit breaker is recommended for each PROFILO LED 120 HQS unit.
Use only AC supplies 100-240V 50-60 Hz.
PROFILO LED 120 HQS should never be located in position exposed to rain or in areas of extreme humidity.
A good air ventilation is essential for proper equipment work.

6.3 Safety:

Risk Group 2 product according to EN 62471. Risk Group 2

CAUTION. Do not look directly into the light output. May be harmful to the eyes and skin.

Do not stare at the operating light source.

The luminaire should be positioned so that prolonged staring into the luminaire at a distance of 6 m is not expected.

The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

The unit is not for household use and must be installed by a qualified electrician or experienced person.

The external surface of the unit may exceed 60°C; never handle the unit until at least 5 minutes have elapsed since the unit was turned off.

Never install the unit in an enclosed area lacking sufficient air flow.

The ambient temperature should not exceed 40°C. t_a 40°C

6.4 Waste Electrical and Electronic equipment (WEEE) directive:

The unit, accessories and packaging should be sorted for environmental-friendly recycling.

For EC countries: according to the European Directive 2012/19/EC for Waste Electrical and Electronic Equipment and its implementation into national right, luminaires that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

7- INSTALLATION

The unit is suitable for dry locations only.

PROFILO LED 120 HQS can be installed on a truss or on the ceiling.

It is recommended the use of appropriate clamps to fix the unit to the mounting surface.

ATTENTION:

A safety cable (code 0521A010) must be securely fixed to the unit's mounting bracket and to the support structure of the projector as shown in the picture below.

Fixing clamps and safety cable are available on request.

8- INPUT / OUTPUT CONNECTIONS

9- DMX SIGNAL CONNECTION:

The unit operates using a digital DMX 512 signal.

Connection between the controller and the unit or between units must be carried out using a two pair screened $\varnothing$ 0.5 mm.

Ensure that the conductors do not touch each other.

Do not connect the cable ground to the DMX connector chassis.

The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one.

In this way, all the projectors are cascade connected.

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor between pin 2 and 3.

The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XLR CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

9.1 DMX addresses

PROFILO LED 120 HQS can be used in 5 DMX modes:

1. 10 channels (Default)
2. RGBA (4 channels)
3. 6 channels
4. FINE (10 channels)
5. PROM (11 channels)

In order to use the unit in 10 DMX channels mode (Default), set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A011	If you want to select the next projector, just add "10"
Projector 3	A021	
.....	A....	
projector 6	A051	

9.2 Selecting the DMX address

- 1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

10- RDM FUNCTIONS

By using a RDM controller it is possible to set DMX address, DMX mode and other parameters.

PROFILO LED 120 HQS accepts the following RDM commands:

11- FIRMWARE UPDATING

To update the firmware release of the PROFILO LED 120 HQS you need:

- DTS Dongle Firmware Uploader (code 03.LA.206).
- “DTS Firmware Upgrade Utility v.2.02” program installed on PC.
- Latest firmware release available for PROFILO LED 120 HQS unit.

Updating the firmware release.

Please follow the procedure below to perform the update:

1. Connect the DTS Dongle Firmware Uploader to a spare USB port on the PC.
2. Connect the unit DMX input to the DTS Dongle Firmware Uploader DMX output with a standard DMX cable and turn ON the unit.
3. Send the new firmware release into the unit by using “DTS Firmware Upgrade Utility v.2.02” program. At the end of the procedure, the unit will reset.

For more information please refer to an authorised DTS service centre.

12- DISPLAY FUNCTIONS

The PROFILO LED 120 HQS display panel shows all the available control menus. Using these options, it is possible to change the fixture's setting. Changing the DTS settings can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

MENU	• To access the control menus in the display panel. • To return to the previous level in the menu structure without making a change. • To exit the menus.
ENTER	• To select any required menu. • To confirm any changes.
UP / DOWN	• To navigate the menus structure. • To change any value.

FIRMWARE RELEASE	1.00

13- REC MODE

DMX Recorder mode

For the programming of ChPr by using a DMX controller, besides the 10 channels necessary to control the unit a further 3 DMX channels are needed.

So that in RECORDER mode (via DMX) the unit will need 13 channels to be correctly programmed.

The three new DMX channels are:

DMX channel 11 = SCENES channel

From 0-10 = no function (r001)

From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016)

DMX channel 12 = EDIT channel:

-From 0-19 = no function

-From 20-234 the unit runs the configuration given by the received input DMX values.

With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.

-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.

With the channel REC it is possible to record the selected scene as last scene.

DMX channel 13 = RECORDING channel

Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded). It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene (Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed.

14- MANUAL MODE

Manual mode can be activated by pressing at the same time 'UP' and 'DOWN' keys on unit display for 3 seconds (A001).

In Manual mode it is possible to select:

<i>rEd</i>	<i>0-255</i>	RGBA levels selectable by user. Default = 255
<i>GrEE</i>	<i>0-255</i>	
<i>bluE</i>	<i>0-255</i>	
<i>ANbE</i>	<i>0-255</i>	
<i>SHut</i>	<i>0-255</i>	Shutter level selectable by user as on DMX channel 5 (SHUTTER) Default = 15
<i>dinn</i>	<i>0-255</i>	Dimmer level selectable by user as on DMX channel 6 (DIMMER) Default = 255
<i>cct</i>	<i>OFF</i> <i>2700</i> <i>8000</i>	12 White color temperature selection from 2700K to 8000K as on DMX channel 8 (CCT). CCT has priority on RGBA channels. Default = OFF
<i>Esc</i>		Esc from Manual mode

When Manual mode is active, unit switch OFF/ON cycle will maintain Manual Mode selection.

In Manual mode the DMX signal is ignored.

15- ERROR MESSAGES

ERROR SHOWED ON DISPLAY	APPEARS WHEN
<i>LEd SEnSor Error</i>	LED thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>LEd ouErteMPERAturE</i>	LED temperature detected over 70°C. Unit immediately goes in black-out.
<i>Micro SEnSor Error</i>	Micro controller thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>Micro ouErteMPERAturE</i>	Micro controller temperature detected over 70°C. Unit immediately goes in black-out.
<i>drU1 SEnSor Error</i>	Thermal sensor on outputs 1 and 2 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU1 ouErteMPERAturE</i>	Temperature detected over 70°C on outputs 1 and 2 of LED Driver board. Unit immediately goes in black-out.
<i>drU2 SEnSor Error</i>	Thermal sensor on outputs 3 and 4 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU2 ouErteMPERAturE</i>	Temperature detected over 70°C on outputs 3 and 4 of LED Driver board. Unit immediately goes in black-out.

17- SOFTEN FILTER

A Soften Filter 10° (code 02SK0464) is provided as standard accessory.

The Soften Filter eliminates the shadows typically created by the latest-generation multi-chip LEDs, giving a perfectly homogeneous projection.

To properly install the filter:

1 - Remove the marked screw and slide the panel.

2 - Put in place the Soften Filter as shown in the picture.

3 - Soften Filter properly inserted.

18- GOBO HOLDER

The Gobo Holder for PROFILO LED 120 HQS (code 03.TA224) is available on demand (Metal / Glass Gobo not included).

Gobo dimensions:

Ø external = 66 mm

Ø of image = 48 mm

Thickness = from 0.2 to 3 mm

How to fix the Gobo on Gobo Holder:

- 1 - Loose the marked screws fixing each metal plate.
- 2 - Put in place the Gobo and tighten again the screws.

To properly install the Gobo Holder:

- 1 - Remove the marked screw and slide the panel.

2 - Put in place the Gobo Holder as shown in the picture.

3 - Gobo Holder properly inserted.

19- IRIS/DIAPHRAM

The Iris/Diaphragm for PROFILO LED 120 HQS (code 03.TA223) is available on demand.

To properly install the Iris/diaphragm:

1 - Remove the marked screw and slide the panel.

2 - Put in place the Iris/diaphragm as shown in the picture.

3 - Iris/diaphragm properly inserted.
